Notes for competitors

1. The large crags are dangerous. Do not attempt to go up or down them (without a rope).
2. The sides of Backstone Beck, the main N-S river are steep and awkward to cross. Best to use the paths.
3. Almost all of the lower slopes of the moor are covered in bracken. This would normally be shown as undergrowth - walk or fight. It has been left unmarked for clarity. Stick to the paths. The upper slope is mostly heather. This is undergrowth - walk. It's probably better to stick to the paths here as well.
4. There are many unmarked paths.
