10 points per control

Minus 10 points per minute late

Thank you to all who attended the Woodhouse Moor event including a number of first timers. The area isn't the biggest so with guidance from the mapper Richard Foster and controller Leon Foster we opted to have two separate maps with a map exchange. I decided to split the map into two separate areas to give two slightly different challenges; first the moor and the university; then second the intricate housing estates of Little London. As this was two maps it wasn't feasible to do this as a MapRun so I didn't get the luxury this time of seeing all of your routes from home! I am pleased to hear that you enjoyed the event and in particular the challenge of which way to go through the uni campus. Some of you opting for the service tunnel in the dark rather than the small gap and diagonal route choice to the South of the building. Thanks must go to Richard who made some very late changes to the map, Leon for controlling, and Dave for organising the event on the day.
